# HEALTHY TAN

## The *Day Spa* at Universal

### What is Healthy Tan and how does it work?

Healthy Tan is air-brushed body tanning. Its main ingredient, DHA, reacts with the amino acids in the outer layer of your skin. This process results in a golden tan appearance that can last up to 10 days.

### How often should I Healthy Tan?

We suggest being sprayed once a week in order to maintain your tan.

### What do I wear to be sprayed?

You may wear a bathing suit, undergarments or choose to avoid tan lines all together. Your clothing will not be damaged in the process.

### Before your tanning session...

- Shower, shave, and exfoliate
- Wear loose fitting clothes and sandals
- Limit physical activity and avoid sweating

### After your tanning session...

- Avoid immersion in water for at least 8 hours
- Moisturize! Moisturize! Moisturize!

A healthy  
**GLOW**  
for a special  
occasion!

“This process results  
in a golden tan  
appearance that can  
last up to 10 days.”
